

## Task of 2nd December

# Delegate Pattern

Create a demo similar to the one in the link shown below (you can use random images):  
<https://drive.google.com/file/d/1-0HRiU2e3kEgCcVh63yHUMZXa3xypSyn/view?usp=sharing>

Instead of directly setting the **FirstViewController** as the **SecondViewController**'s delegate, write a separate protocol called **ChangeBGColorDelegate** that has a function called **changeImage(image:)**. Here, **image** is of the type **UIImage**.

- The **SecondViewController**'s delegate should be of type **ChangeBGColorDelegate** protocol.
- Make the **FirstViewController** conform to the **ChangeBGColorDelegate** protocol.
